

## PORTA-LIFT CANOPY TOP

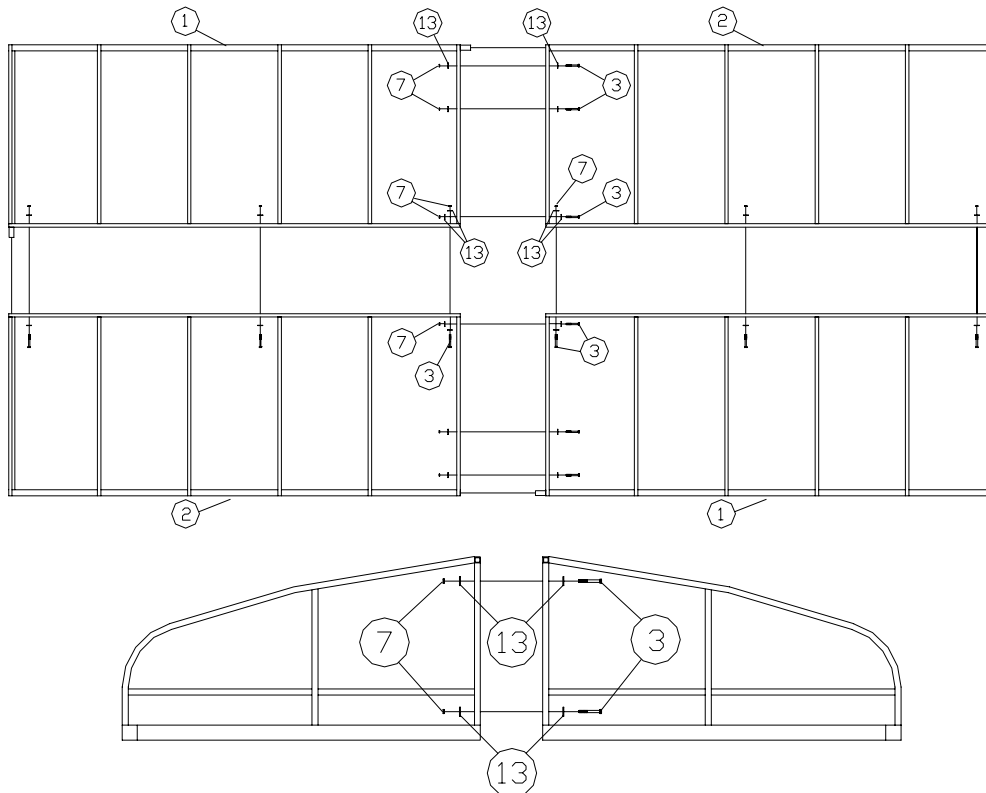

**Thank you for purchasing our product!**  
**\*Please read these instructions and follow them step by step.\***

**Caution-- If installing or adjusting a canopy mounting bracket on a lift with an existing chain drive winch with mounting tabs, make sure there is no load on the lift before removing the top bolt from the winch. On all other winches the bed must be lowered with the load removed from the bed before the winch is taken off.**

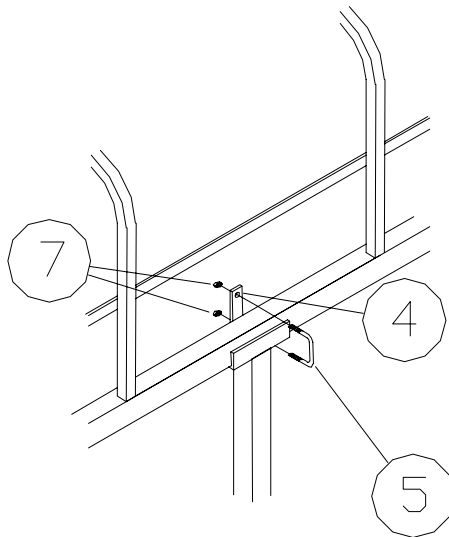

**Step 1.** Set the four canopy mounting brackets (REF. # 6) into the top of each vertical upright of the side member so that the open side of the angle on the mounting bracket is facing to the inside of the lift. Set to desired height using bolts, washers, & nuts (REF. # 10, 13, & 7).

**Step 2.** Set the four canopy sections together with the two stubbed sections (1265 canopy sections do not have stubs) (REF. # 1) in opposite corners. Slide the stubbed ends into the open-end tube sections (REF. # 2) and bolt with 3/8" X 2 1/2" bolts, washers, & nuts (REF. # 3, 13, & 7).  
**NOTE: 1265 models will have four fewer bolting locations than the larger canopy shown in the instruction.**

**Step 3.** Set the canopy into the four mounting brackets and adjust to desired location. Starting from the outside, place a U-bolt (**REF. # 5**) horizontally around the mounting bracket angle and the bottom tube of the canopy frame. Place the U-bolt plate (**REF. # 4**) over the U-bolt and fasten with 3/8" nuts.
